Septic Maintenance Rebates

In 2019, the Regional District of Nanaimo (RDN) is offering rebates in four categories, plus a bonus for SepticSmart workshop participants, to help you maintain your septic system.

- 1 Up to \$200 for installing or replacing a **Distribution Box***
- 2 Up to \$300 for installing **Risers***
- 3 Up to \$100 for installing an **Effluent Filter***
- 4 \$600 towards the replacement of a **Malfunctioning System***

BONUS

SepticSmart workshop participants qualify for up to \$100 extra towards an eligible claim. See front page of this flyer or visit www.SepticSmart.ca for a listing of 2019 workshops.

**The RDN will rebate 75% of eligible expenses to a maximum amount for Categories 1-3 and the Bonus. Flat rate for Category 4. The maximum rebate is \$600, or \$700 for workshop participants.*

Rebates are available until December 13, 2019 or until funds are spent.

Since funds are limited, you may apply for pre-approval to "reserve" funds for eligible work for up to 90 days. New construction and tank pump-outs are not eligible for a rebate.

- 1 When present, a properly functioning **Distribution Box** will maximize the effective lifespan of a drainfield. A tilted or damaged distribution box will distribute the effluent unevenly.
- 2 **Risers** provide surface access to buried components. Risers make future pumping, inspection, and maintenance much easier. If you have risers, you have little to no digging to do hereafter.
- 3 An **Effluent Filter** can prolong the life of your system by keeping solids out of the drainfield.
- 4 Replace a **Malfunctioning System**. Most septic systems last 25-30 years. Eventually, all systems need to be replaced.

Visit www.SepticSmart.ca for rebate forms and a complete list of eligibility and requirements.
