

## River's Edge Well Drilling – Site Clearing in Park Land Continuing

Date: May 9 - 16, 2025 (including the weekend)

Time: 8 a.m. to 4:30 p.m.

### Trail Closure: May 9 - 16, 2025 at Kaye River's Edge Community Park

As part of the Well Drilling Project, site clearing will continue to take place at the four well drilling sites in River's Edge, as identified on the site map on the following page. The tree-falling work is complete, and the next step is to remove the tree stumps, clear the brush and level the soil at the well sites.

Brush-clearing at the sites of PW05, PW06 and PW08 will not affect park users, however, the park trail at site PW07 will be temporarily closed for five to seven days while stump removal is underway. The temporary park trail closure will be marked with signs at both entrances to the trail. As part of the well site preparation, the trail will be realigned temporarily near PW07 to ensure that park use may safely resume.

Brush-clearing and stump removal work is expected to begin on Monday, May 12, 2025, and will take place during daylight hours. Intermittent noise from a small excavator can be expected. No interruption to traffic flow on the roadway is expected. For your safety and the safety of the work crew, please remain alert to work activities and obey any posted signs.
