

June 25, 2025

Well Drilling in River's Edge Water Service Area Beginning June 30

Date: June 30 to September 30, 2025

Time: 8 a.m. to 4:30 p.m.

Well drilling will begin on June 30 at the PW05 Peterson Road site (please see the map on the next page). One well is expected to be drilled at each of the four prospective well sites between June 30 and September 30, 2025.

The well drilling crew will move from PW05 to PW06, then PW07 and lastly PW08. Once the wells are drilled, the crew will move between each site to complete other drilling activities such as setting the well screens and carrying out the pump tests, etc.

The well drilling is not expected to affect park users, however, for your safety and the safety of the work crew, please remain alert to work activities and obey any posted signs. While low levels of construction noise from the well drilling equipment can be expected, there will be no disruption to local traffic.
