

REQUEST FOR STATEMENTS OF QUALIFICATION No. 26-031

Residential Rainwater Management Guidebook Services

Addendum 2

Issued: July 21, 2026

Closing Date & Time: on or before 3:00 PM Pacific Time on August 4, 2026

QUESTION & ANSWER:

Q1. The RFSQ mentions condensing and modernizing the existing guidebook. We noticed the current edition is approximately 100 pages long and were wondering whether the RDN has an anticipated target length/page range for the updated guidebook (i.e. 50-70 pages vs 20-30 pages). We understand the final scope will be refined with the successful proponent, but even a rough estimate would help us ensure we can dedicate the appropriate resources within the project timeframe.

A1. We are hoping to make this new guidebook accessible, reference the previous Rainwater Harvesting guidebook where necessary and align with the RDN's Sustainable Site Planning Guide. As such, we are aiming for it to land in the 40-50 page range, inclusive of all graphics and potential appendices. This can be further refined during the final project scoping.
