Addendum 5a
Responses to Vendor Questions

1. Question:

Can you please describe the storage and insurance requirements surrounding the Brentwood equipment?

Answer:

As per Appendix D, Section 1.3.1, a part audit shall be conducted two months prior to the commencement of the general Scope of Work. Any missing or damaged parts are required to be identified to the RDN, and replacement shall be the responsibility of the RDN. This exercise is considered the handover. After handover is complete, the parts shall be the responsibility of the contractor up until installation. Any damaged or missing parts from handover to contract completion is the responsibility of the contractor.

A sea-can will be provided to the contractor for storage, but it is not able to store all of the Brentwood equipment. Some equipment is too large (ie: flights)

Insurance of these parts are not a requirement as part of the project.
