

NOTICE

WATER WELL DRILLING

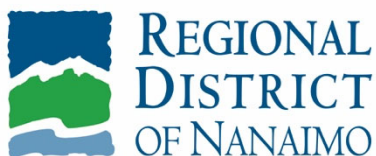

CARSON ROAD

Date: November 27, 2019

The RDN wishes to notify you that a contract well driller (Drillwell) has mobilized to the Carson Road drilling site, and has begun drilling a potential new water supply well for the RDN Whiskey Creek Water Service Area. If successful, this groundwater well is anticipated to replace the surface water supply from Crocker Creek.

Your water service will not be interrupted while well drilling is underway. After drilling, the next steps are to design & order a well screen, and complete a pump test. Further information will be posted as it becomes available. Please contact the RDN if you have any questions or concerns.

Thank you!
