

DEVELOPMENT PERMIT APPLICATION REQUIREMENTS

Where a parcel is designated within a development permit area (DPA) by an official community plan and a proposed development is not exempt from the DPA guidelines, the property owner or agent is required to apply to the Regional District of Nanaimo (RDN) Board for the approval of a development permit. The approval will outline any conditions of approval and will regulate the development of the property. To confirm whether a parcel is within a development permit area, please consult the Planning Department or refer to the applicable electoral area official community plan.

It is strongly recommended that you contact Planning staff to discuss your proposal prior to submitting an application. Upon submission of a development permit application along with all required information and application fee(s) (see Submission Requirements below), planning staff will review the information and prepare a report to the Electoral Area Services Committee (EASC), which is a committee of the RDN Board. Certain development permits may be issued under delegated authority by the General Manager of Strategic and Development Services under "Regional District of Nanaimo Delegation of Authority Bylaw 1759, 2017" and may not be required to go to EASC or the RDN Board. Staff should be contacted to determine whether or not a permit can be approved under delegated authority. Please refer to the "Regional District of Nanaimo Impact Assessment Bylaw No. 1165, 1999" and "Regional District of Nanaimo Development Application, Notification Procedures and Fees Bylaw No. 1845, 2022" for specific information required to support an application. If a variance to a zoning bylaw is required as part of the development proposal, such variances may be considered as part of the development permit application.

Following the EASC's review of the proposed development permit, public notification is completed if any variances are proposed, and the Committee's recommendation is forwarded to the RDN Board for consideration. A resolution by the Board must be passed to approve and authorize issuance of the development permit. Once the permit is in place, the required building permits may be issued.

Board Policy

The RDN Board has adopted "Board Policy B1.5 Development Variance Permit, Development Permit with Variance and Floodplain Exemption Application Evaluation" which sets out evaluation criteria to be used in the consideration of development permit applications with variances proposed. Information required as a result of Board adoption or amendment of Policies and Bylaws may change from time to time. Please contact Planning staff prior to making an application.

Submission Requirements

To make an application for a development permit, the required fee and a completed application form must be submitted, along with any applicable additional information as listed in the application form.

SECTION 5: APPLICATION COMPLETION CHECKLIST:

	ALL MEASUREMENTS TO BE IN METRIC
	A copy of state of title certificate(s) and corporate registry search (if applicable) dated within past 30 days
	A letter outlining the details of the Application
	Application fee as required by Bylaw No. 1845, 2022
	Two (2) survey plans certified by a BC Land Surveyor to a maximum scale of 1:500, showing: location of existing and proposed buildings and structures and parts thereof, address, legal description, name of applicant, date, property lines, scale, north arrow, all easements and right of ways, restrictive covenant areas, location of all watercourses and associated setbacks,and building setbacks as per Zoning and Floodplain Bylaws
	Electronic copies of all plans
	Property Declaration Form
Addi	ional information may be required, such as:
	Two (2) building elevation plans to a maximum scale of 1:100
	Two (2) survey plans certified by a BC Land Surveyor including topographical information
	Professional Engineer's Report
	RDN Sustainable Development Checklist Residential Commercial
	A letter of authorization (To be completed if the applicant is not the registered owner)
	Environmental Assessment
	Landscape Plan
	Site Profile Form
	Riparian Area Assessment
	Other
	SECTION 6: Applicant Signature
	eclare that all the above noted statements and information contained in this application and documents are true and correct.
App	icant Signature Date
App	icant Name (Please Print)

In order to process your application, please provide all necessary documentation with your application. Please retain a copy of the submitted application for your records. Contact the RDN Planning Department for assistance.

> Submit the completed application form, required fee, plans, and supporting material to the Regional District of Nanaimo. The fee is payable to the "Regional District of Nanaimo".

Personal information collected on this form is collected for the purposes of processing this application and for administration and enforcement. The personal information is collected under the authority of the Local Government Act, Regional District of Nanaimo Bylaws and pursuant to section 26 of the Freedom of Information and Protection of Privacy Act.

Property Declaration Form

for Riparian Areas, Nesting Trees, Coastal Floodplain, and Site Profiles

Civic Address:	9 Digit PID:
Legal Description:	
<u>Riparian Areas</u>	
I (we) acknowledge that the province of British Columbia enacted critical features, functions, and conditions required to sustain fish hab Regional District of Nanaimo (RDN) from approving or allowing watercourse until it has received notice that a report prepared by a received by the Ministry of Environment & Climate Change Strategy.	pitat. Furthermore, this legislation prohibits the ng a development to proceed adjacent to a
I (we) understand that a water feature includes any of the following:	
a) any watercourse, whether it usually contains water or not;b) any pond, lake, river, creek or brook; and/or,c) any ditch, culvert, spring, or wetland.	
I (we) declare that I (we) are familiar with the property and area, and h for the existence of any water features. I (we) declare that (<i>please chec</i>	·
that there are no water features located on the subject prothere are water features located on the subject property.	operty; or
I (we) declare that all proposed development including land alteration of a building or structure (please check the one that applies):	n, vegetation removal, alteration or construction
□ is greater than 30.0 metres from a water feature; or□ is less than 30.0 metres from a water feature.	
Coastal Floodplain	
I (we) acknowledge that a building located in a marine coastal area master storm surges and wave effects.	y be subject to flooding as a result of high tides,
I (we) declare that we are familiar with the property and area, and has for the existence of the marine coast.	ave inspected the property and immediate area
I (we) declare that (please check the <u>one</u> that applies):	
 □ the property is located more than 100 metres from the mar □ the property is located less than 100 metres from the mar 	

Eagle and Heron Nesting Trees

I (we) acknowledge that the Wildlife Act protects Bald Eagles and Great Blue Herons, their eggs and nests. Bald Eagles and Great Blue Herons are sensitive to development near their nesting sites and may return to a nest that has been unused for a number of years.

While the provincial government and the RDN undertake mapping of nesting sites from time to time, not all are mapped. Some on private property may have been undetected, and new nests are continually being built. Typically, a 60 metre radius for an eagle nesting tree and depending on the level of development in an area, a 60 - 300 metre radius for a heron nesting tree (or trees) is considered to be sensitive to disturbance. Electoral Areas A, E, G and H require that a development permit be obtained prior to development near an eagle or heron nest.

	gle and heron nest trees can be found on the Community Mapping Network at wmmaps.ca/GBHE/ .
•	re that I (we) are familiar with the property and area, and have inspected the property and immediate area tence of eagle or heron nests prior to completing this form. I (we) declare that (<i>please check the <u>one</u> that</i>
	there are no eagle or heron nesting trees on or within 100 metres of the subject property; there is an eagle or heron nesting tree on or within 100 metres of the subject property.
Site Profile	- section to be completed for demolition, subdivision, rezoning, development or development variance permit
Act requires being used the Contan 2 activities content/en	owledge that when an application is made to the RDN, Section 40(1) of the <i>Environmental Management</i> is that a Site Profile be completed when the applicant knows, or reasonably should know, that the land is or has been used for industrial or commercial purposes of the type listed in Schedule 2 of initiated Sites Regulation, unless otherwise exempt under the Regulation. Please find the list of Schedule and Site Disclosure Statement on the Government of BC website at www2.gov.bc.ca/gov/vironment/air-land-water/site-remediation/site-identification . Please contact the RDN Planning it if any of the activities listed in Schedule 2 apply to the subject property.
I (we) declar	re that (please check the <u>one</u> that applies) :
	I (we) have read the <i>Contaminated Sites Regulation</i> Schedule 2 document, and determined that the subject property has been used for purposes listed in Schedule 2, and filled out the Site Disclosure Statement; or
	I (we) have read the <i>Contaminated Sites Regulation</i> Schedule 2 document and am (are) not required to submit a Site Disclosure Statement as to my (our) knowledge, the subject property has not been used for any of the activities listed in Schedule 2; or
	I (we) have read the <i>Contaminated Sites Regulation</i> Schedule 2 document and am (are) exempted from being required to submit a Site Disclosure Statement under Section 4 of the <i>Contaminated Sites Regulation</i> . I (we) have provided the following information in support of this exemption: (List information below, use additional pages as required)

REGIONAL DISTRICT OF NANAIMO

POLICY

SUBJECT:	Development Variance Permit, and Development Permit with Variance Application Evaluation	POLICY NO: B1.5 CROSS REF.:
EFFECTIVE DAT	E: March 8, 1994	APPROVED BY: Board
REVISION DATE	E: November 9, 2023	PAGE: 1 of 4

PURPOSE

This policy is to provide staff with guidelines for reviewing and evaluating development variance permit applications and development permit applications that include bylaw variances.

PART A – DEVELOPMENT VARIANCE PERMIT AND DEVELOPMENT PERMIT WITH VARIANCE APPLICATION EVALUATION

1. Demonstration of Land Use Justification

- a) An application should demonstrate that the proposed variance is necessary and is supported by an acceptable land use justification; such as:
 - i. the ability to use or develop the property is unreasonably constrained or hindered by having to comply with the bylaw requirement; or,
 - ii. there is a net benefit to the community or immediate area that would be achieved through the variance approval.
 - iii. the proposed variance would allow for more efficient and effective use and development of the subject property.
- b) Failure to provide an acceptable land use justification as outlined in Part A, Section 1(a) may be grounds for staff to recommend that the application be denied by the Board.
- c) If an acceptable land use justification is identified the applicant should demonstrate that a reasonable effort has been made to avoid the need for, or reduce the extent of, the requested variance. If such efforts are not made this may be grounds for staff to recommend that the application be denied by the Board.
- d) Examples of acceptable land use justifications are as follows:
 - i. A physical constraint such as a steep slope, watercourse, or rock outcrop results in an unreasonably small building site when setbacks are applied. In such a case a setback variance

- may be recommended where the impact of the variance is considered acceptable by planning staff.
- ii. A man-made constraint such as an archaeological site, uniquely shaped lot, restrictive or conservation covenants, easement, or right-of-way results in an unreasonably small building site when setbacks are applied. In such a case a setback variance may be recommended where the impact of the variance is considered acceptable by planning staff.
- iii. A hazardous condition exists that requires that the underside of the floor joists be raised to meet floodplain elevations. This may result in an average designed building or structure exceeding the maximum height restrictions. In such a case a height variance may be recommended where the impact of the variance is considered acceptable by planning staff.
- iv. A topographical constraint such as a depression or sloped area results in an average designed building or structure exceeding maximum height restrictions. In such a case a height variance may be recommended where the impact of the variance is considered acceptable by planning staff.
- v. An environmentally significant feature such as a stand of Garry Oak trees, a watercourse, or sensitive ecosystem exists on site that the applicant is proposing to avoid, preserve, and/or enhance, which restricts potential building sites on a lot. In such a case a setback variance may be considered where the proposed variance will reduce the impact to the Environmentally Sensitive Area and any other impact considered acceptable by the reviewing planning staff member.
- vi. The only building site on a lot will block a significant view for area residents. In such a case a setback variance may be considered to allow the relocation of the building to allow the preservation of that view, where the impact of the variance is acceptable.
- vii. Where a longstanding existing building or structure does not conform to siting or height requirements a variance may be considered to legalize that structure where the impact of the variance is acceptable and the use of the building or structure conforms to the current zoning regulations.
- viii. The inclusion of a renewable solar or wind energy system, or a rainwater harvesting system proposed for the operation of a building or structure results in the building or structure exceeding maximum height restrictions or encroaching into a setback area. In such a case, a height variance or setback variance may be recommended where the impacts of the variance are considered acceptable.
- e) Part A, Section 2(d) is not intended to be an exhaustive or definitive list of acceptable land use justifications for a variance application. Staff are to use their judgment in evaluating the specific circumstances involved in each application.

2. Impact Evaluation

a) Where a land use justification for a proposed variance has been demonstrated, the application shall then be evaluated based upon the impact(s) (positive or negative) of the variance. Impact(s) may be classified into the following three general categories:

- i. Aesthetic impact. This includes the impact of the proposed variance on the streetscape, the views from adjacent properties, compatibility with neighbourhood design standards, etc.
- ii. Functional impact. This includes the impact of the proposed variance on the function of the property for the permitted uses and the potential impact of the variance on the function of adjacent properties, or road right-of-ways.
- iii. Environmental impact. This includes the impact of the proposed variance on the long term sustainability of the natural environment or the direct impact on a specific feature of the natural environment.
- b) An unacceptable impact, as evaluated by planning staff, is grounds for staff to recommend that the application be denied by the Board.
- c) An applicant should demonstrate that a reasonable effort has been made to minimize any and all potential negative impacts associated with a variance. If such efforts are not made this would be grounds for staff to recommend that the application be denied by the Board.
- d) Part A, Section 2(a) is not intended to be an exhaustive or definitive list of potential impacts. Staff are to use their judgment in identifying and evaluating all potential impacts associated with the specific circumstances involved in each application.

3. Specific Impact Evaluation by Application Type

- a) Height variance requests for a residential use may not be supported where; in the opinion of planning staff:
 - i. the applicant is requesting a height variance to accommodate a third storey;
 - ii. the applicant has not made a reasonable effort to reduce the height of the proposed building or structure by reducing the roof pitch, reducing ceiling height, minimizing the crawl space, etc.;
 - iii. the appearance of the proposed structure from the street will appear out of character with the height of buildings in the immediate neighbourhood;
 - iv. the proposed height variance will result in a notable reduction in a neighbouring properties view of a significant viewscape; or
 - v. the proposed height variance will result in a notable shading of, or lack of privacy for, a neighbouring property.
- b) Lot line relaxation, setback from the sea relaxation, and watercourse setback relaxation requests may not be supported where; in the opinion of Planning Staff:
 - vi. the applicant has not made a reasonable effort to reduce the need for a setback variance by amending the house design or finding an alternative building site;
 - vii. the proposed setback variance will result in an unreasonable reduction in a neighbouring properties view of a notable viewscape;

- viii. the proposed setback variance will result in the building or structure appearing to extend closer to the sea or other watercourse than other houses in the immediate vicinity;
- ix. the proposed setback variance may result in a geotechnical or flooding hazard, including impacts associated with sea level rise to the year 2100;
- x. the proposed setback variance may result in a negative impact on the natural environment;
- xi. the proposed setback variance may have a negative impact on an archaeological site; or
- xii. the proposed setback variance is contrary to senior government legislation (e.g., *Transportation Act, Riparian Areas Protection Act, Water Sustainability Act, Land Title Act*, etc.).
- c) Parking Variance requests for Commercial, Industrial, or Institutional uses may not be supported where:
 - i. the proposed variance would interfere with internal traffic flow, loading and unloading, access and egress, pedestrian safety, etc.;
 - ii. the applicant is not proposing to provide adequate parking spaces constructed to Regional District of Nanaimo standards on a hard durable dust free surface; or
 - iii. the proposed variance, in staff's opinion, does not provide an adequate number of parking stalls for the intended use.
- d) Signage variance requests may not be supported where:
 - i. the proposed variance would result in an increased appearance of "sign clutter" on the subject property (sign consolidation should be encouraged);
 - ii. the proposed variance creates a visual obstruction which interferes with the safe movement of pedestrians and/or traffic on and off site; or
 - iii. the illumination of a proposed sign is not compatible with the surrounding neighbourhood or would create an unreasonable aesthetic impact on the adjacent properties.

PART B - TERMS OF USE OF THIS POLICY

- 1. This policy is intended to apply to staff evaluation of development variance permits, and development permit applications that include bylaw variances.
- 2. The Board of the Regional District of Nanaimo is not in any way bound by this policy and is free to apply, or not apply, any evaluation criterion it deems appropriate in its consideration of applications.
