With the evolution of online healthcare, you can now purchase Ritalin online and experience a same day, stress free process through a premier fulfillment system with nationwide coverage.

What is Ritalin

Ritalin contains methylphenidate, a central nervous system stimulant. It enhances concentration, controls impulsivity, and helps manage hyperactivity. Ritalin is prescribed for both children and adults dealing with attention deficit hyperactivity disorder and is also used to reduce excessive sleepiness in narcolepsy. Because Ritalin is a controlled medication, it requires a prescription from a licensed healthcare provider.
